

Description of Map Units
QUATERNARY SYSTEM
HOLOCENE

Ha **Holocene undifferentiated alluvium**—Undifferentiated deposits of small upland streams; alluvial deposits of minor streams and creeks of varying textures, filling valleys incised into older deposits.

PLEISTOCENE

PRAIRIE ALLOGROUP

Pph **Hammond Alloformation**—topographically lowest of the Prairie surfaces east of the Mississippi Alluvial Valley. Within the Baton Rouge 100K geologic quadrangle, its constructional topography lies hidden beneath a thick layer of Peoria Loess. It is composed of coastal plain deposits of late to middle Pleistocene streams.

Open Water, Inundated Area, Swamp

Fault—normal (Ball and bar on downthrown block, dashed where concealed).

Contact—includes inferred contacts.

Streams

Topographic Contours
